## eye on design

- p**roject Roosevelt
- d**esigner Davis Partnership Architects
- l**ocation 1512 Larimer St. Denver, CO

Roosevelt Bar and Lounge located in downtown Denver has quickly become one of Denver’s hot new gathering places. In late 2013, the design team at Davis Partnership was tasked to take a previously existing space and entirely reinvent it, leaving no reference to the space prior. The new bar and space now offer a unique new twist on an old classic in both design and menu.

Roosevelt specializes in beverages from American small-batch distilleries and craft breweries, and everything about the name Roosevelt and its eclectic interior offers a classic American experience. Enter the bar and you will see glamorous touches added to its masculine prohibition inspired interior. The interior boasts walls of exposed brick, a ceiling covered in warm wood detailed in a herringbone pattern, an upper-level library filled with over 5000 books, leather wing-back chairs, and hand-tufted leather booths

that all invite you to indulge in comfort, and sip sophisticatedly on your classic American cocktail. Other design details include a historically inspired rolling library ladder used at the full-height bar, and restroom entries hidden behind hinged bookcases.

The next time you are in downtown Denver and looking for a classic American fix, stop in to Roosevelt Bar to ensure your craving will be fulfilled!

DESIGN A ROOM OF DISTINCTION.

Every project is unique; the tile you choose should be as well. The timeless, contemporary look of Valor™ by Daltile features a clean, minimalist, limestone look and a versatile, natural color palette. Because it's both durable and elegant, Valor™ is ideal for the high-traffic areas in hospitality and retail designs.

# [sustainability]

in this industry  
sustainability isn't just a buzz word anymore.

it's here to stay.

so we want to know.....

how are YOU sustainable?

**q:** what are 3 sustainable things you do?

[shop local] - markets, markets, markets; I just can't get enough! especially during warmer months, I make sure to enjoy local offerings whenever possible

[green my commute] - not only do I love bikes, but I happen to live close enough to work that biking to the office (and using the office shower) is totally do-able; realistically it doesn't always happen... it's one of my personal "green goals" for this year!

[turn it off] - and by "it" I mean water, lights, music, computer, etc.; you would be shocked to know how much electricity is wasted by simply leaving your unused USB port plugged in. and isn't it the age-old kindergarten take away to turn the water off while you brush? I am still a firm believer... I am determined to save this planet one lightbulb and water droplet at a time!

for me  
sustainability is

- ... a way of thinking.
- ... a way of designing.
- ... a way of functioning.
- ... a way of business.
- ... an ever present way of life.
