Urban Centrality

for Children in a Street Situation

PROJECT'S NAME:

Center for Comprehensive Care and Development for Children and Youth in Street Situations.

GOAL:

Mitigating poverty through urban centrality by creating a comprehensive care and development center for children and youth in street situations.

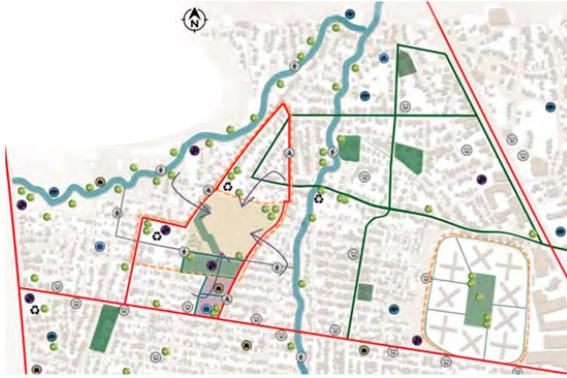

LOCATION:

Maracaibo, St. Zulia, Venezuela

YEAR:

2020 - 2021

With Frank Bohorquez

URBAN PROPOSAL

Due to its economically disadvantaged status, a comprehensive redesign of the urban area is proposed to improve it. Establishing a public transportation route encircling the area is paramount to facilitate the movement of the population within the zone. Additionally, the addition of a cycle lane serves the same purpose. Surrounding the entire zone, a network of sports centers is proposed, along with various recreational areas strategically placed to optimize space utilization. Furthermore, it's crucial to note the designated area for housing relocation.

GENERATOR CONCEPT

Extracted road axes

The axes of the selected roads are established, and the volume is divided in parallel to delineate the usage areas, creating a central void between them.

The volume is extended, and the usage areas and external walkways connecting all project spaces are established.

Residential and Hospitality

PROJECT'S NAME:

Multifamily Housing and Commerce.

GOAL:

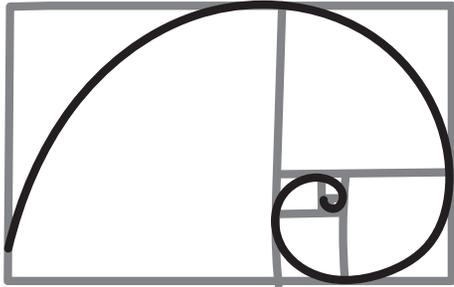

The proposal suggests utilizing the space to revitalize an inactive area, thus generating an attractive point (P.A.) located in the zone with the smallest scale. From there, the Fibonacci formula (increasing factor) is applied.

LOCATION:

Maracaibo, St. Zulia, Venezuela

YEAR:

2019

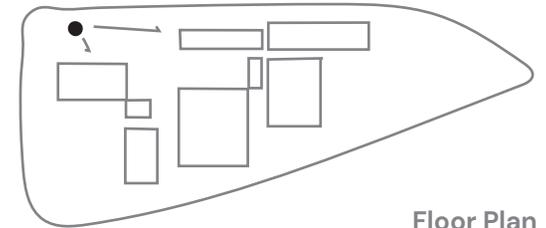

CONCEPT

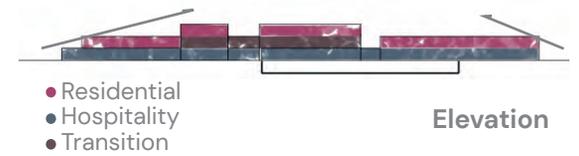

The Fibonacci formula was used to increase the volume of the space organically, creating harmonious proportions. Inspired by nature's Fibonacci sequence, this mathematical approach crafted a design with visual balance and aesthetic appeal. Starting with a base volume and increasing it according to Fibonacci numbers, each expansion seamlessly integrated with the existing structure, resulting in a captivating progression throughout the space.

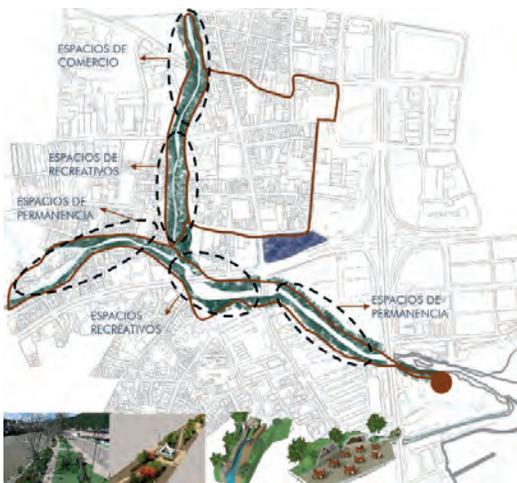

APPLICATION OF THE CONCEPT

Floor Plan

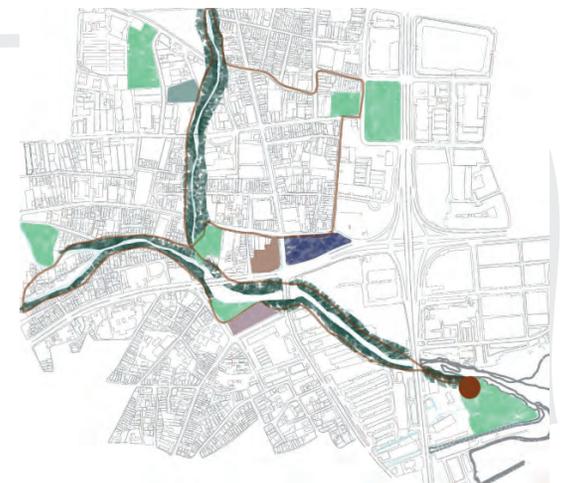

Elevation

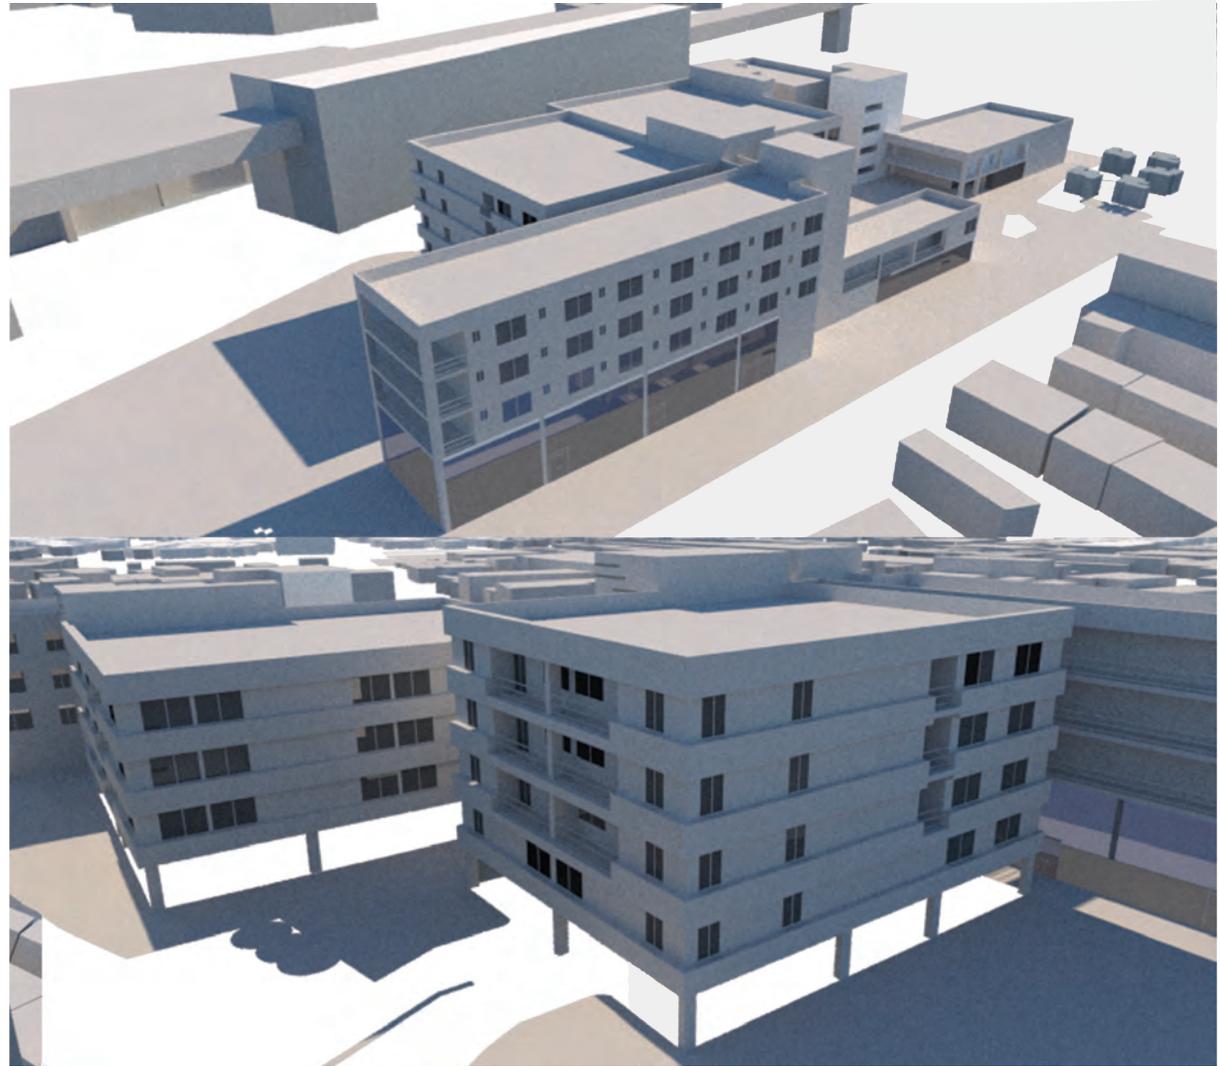

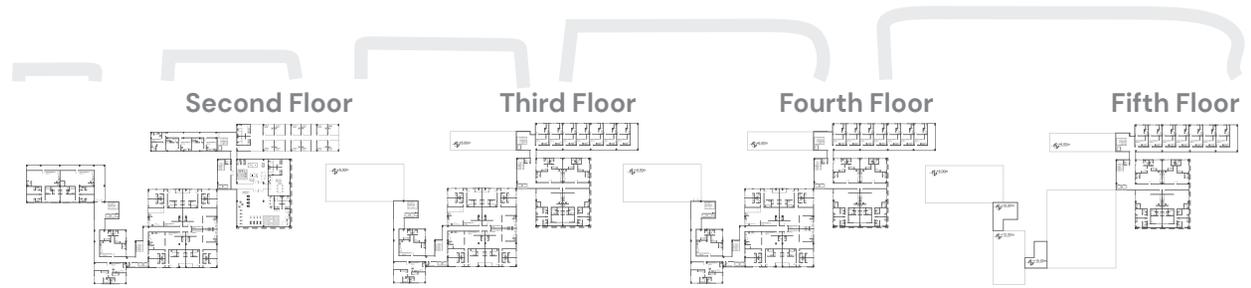

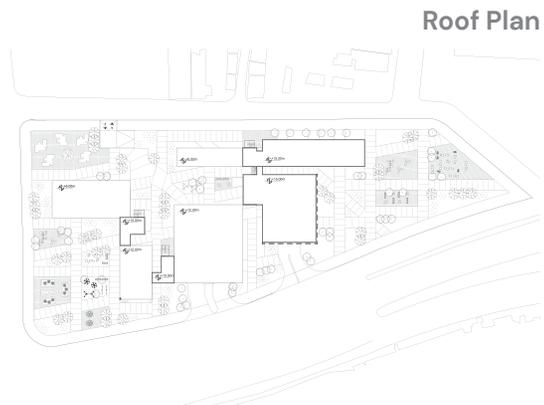

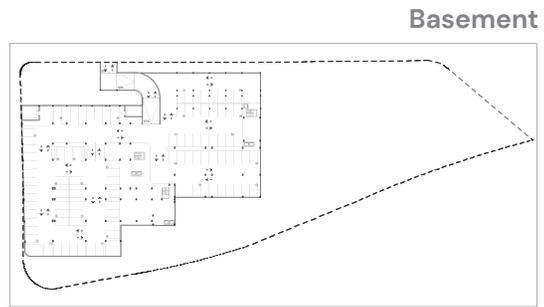

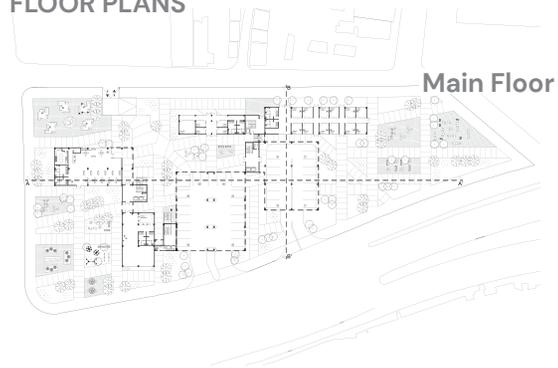

It is proposed to create a linear park along the entire route of the ravine, and along this route, design a series of plazas. Both should include urban furniture and various plant species. In the present urban voids and/or unused commercial spaces, it is proposed to make use of them to revitalize the area with spaces that it lacks.

- Place
- Linear Park
- Cycling Paths
- Park - Green Spaces
- Cultural Space
- Plaza
- Recycling Program

FLOOR PLANS

Revitalize

Center for the Care of Children in Street Situations.

PROJECT'S NAME:

Center for the Care of Children in Street Situations.

GOAL:

Through a centrality, the aim is to revitalize the area and the lives of children and young people in street situations.

Convergence

Restaurant in Savannah, Ga.

PROJECT'S NAME:

Momofuku -David Chang

GOAL:

Convergence refers to merging elements in a space. It represents a harmonious blending of the different elements in a design - colors, textures, and forms. Applying the concept of convergence to interior design, the space will encourage movement and connection with a central, focal point.

LOCATION:

Savannah, Georgia

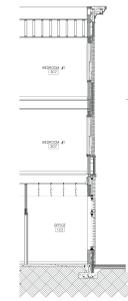

YEAR:

2023

SITE ANALYSIS

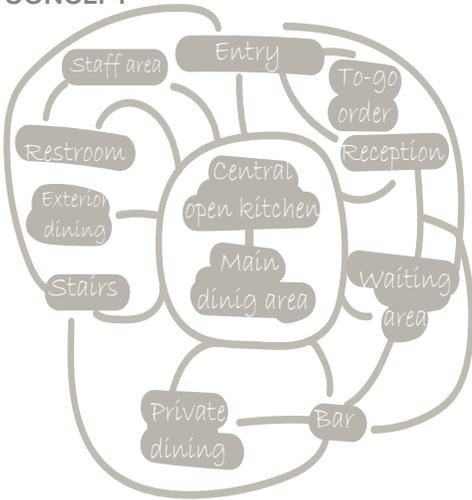

It is noticeable that this area offers a wide range of places to explore, such as landmarks, restaurants, coffee shops, hotels, retailers, and more. There are also two main streets, as well as three small parks and one large park, Forsyth Park.

CLIENT ANALYSIS

David Chang is a renowned chef and restaurateur who has made a significant impact on the culinary world. Born in Virginia, Chang was heavily influenced by his Korean heritage, which can be seen in his innovative take on Korean cuisine. David Chang is famous for his innovative approach to blending Asian and Western cuisine, as well as for his successful restaurant chains.

USER ANALYSIS

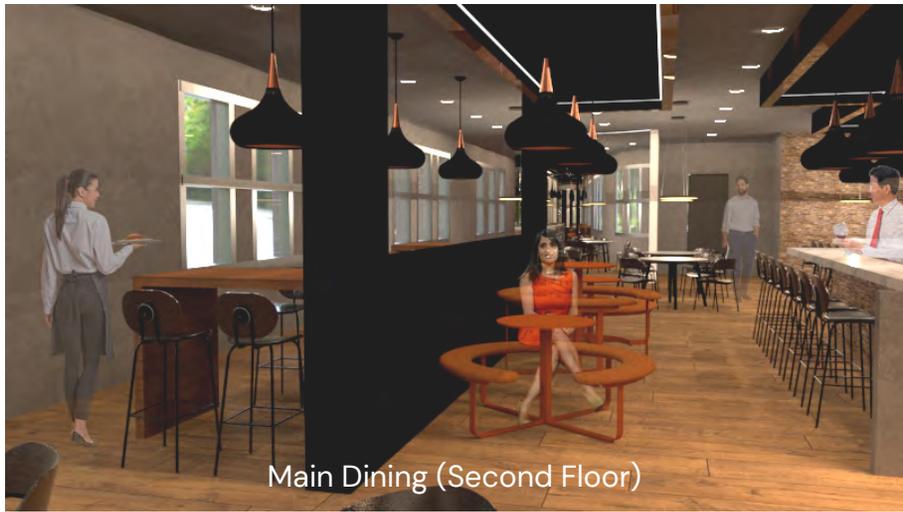

Connected through a double-height space
The principal point of the design is to create a calm, quiet, and dark ambiance. This design will represent how David Chang and his restaurants are.

Dejavu Skybox

PROJECT'S NAME:

Orchesclass

GOAL:

This distinguished classical crossover record company, boasts collaboration with world-renowned musicians. The company seeks a space that harmoniously embodies a classical modern aesthetic. Orchesclass is a successful company that is in a luxury world. They envision a welcoming, adaptable, and timeless environment, ensuring a comfortable space for their clients.

LOCATION:

Unknown

YEAR:

2023

The beauty of classical crossover is that whenever people listen to it, even a new musical piece, it gives the sensation of having experienced it already like a Dejavu. User-friendliness is not just a promise but a reality. Thoughtful configurations of textures, and lighting (inspired by flutes that create a delicate moment), make the space accessible and welcoming. The blending of soft hues with classical and contemporary elements creates an ambiance that is familiar and refreshing. Deja vu enhances the design through comfort, intuition, ethereal, and harmony, creating a memorable experience.
